ATTORNEYS' EYES ONLY SOURCE CODE

1   Q. Can you explain for me the practical differences

2   between this StopPlayback() function and the

3   StopCurrentApp() function?

4   MR. KAPLAN: Object to form.

5   THE WITNESS: So I don't remember exactly when   10:33:25

6   we call this, but I think -- I think this doesn't -- this

7   only stops the playback. So it's as if you're stopping

8   the track, the media track from playing, but it doesn't

9   stop the app itself. So the app is still running.

10   Q. BY MR. SHEA: And if the goal of what -- here,   10:33:55

11   let me try to ask it a different way.

12   Would it have been technically possible --

13   sorry. Let me try it a third time.

14   Were there technical reasons why you chose to

15   use StopCurrentApp() as opposed to StopPlayback() in the   10:34:15

16   RefreshDeviceGroups() function?

17   MR. KAPLAN: Object to form.

18   THE WITNESS: I think StopCurrentApp() is both

19   simpler and covers more cases. So it stops not only

20   playback, but it stops the app itself and -- yeah.   10:34:40

21   Q. BY MR. SHEA: I see here that in the

22   StopPlayback() function, it makes reference to a group as

23   well.

24   Do you see that?

25   A. Yes.   10:35:04
